Dear Bob and Ken:

We have been working together in our strategic alliance for almost seven years. During that time we are regularly reminded that WNA is a reliable and respectable firm with several admirable qualities. Your critical attention to detail and utmost professionalism throughout the various phases of our many projects truly contributed to the success of all of our projects. We know that no detail is too small, no obstacle is too big and Williams Notaro & Associates treats each and every one of our projects as if it was the only one they had.

We have worked with many engineering firms and can say that we have never been given such outstanding service or seen the level of quality evident in your construction documentation. This is reinforced on all of our projects. There are never any client complaints, change orders for missing or incomplete documents, and you always meet the design schedules. In addition, the ability of your engineers to creatively and quickly solve unexpected problems is amazing. Although your entire staff is exceedingly competent, it was always reassuring to know that the principals of the firm were not only readily available, but also involved and knowledgeable of our projects.

Now more than ever before, both Sonny and I are convinced that the strategic alliance between FMDS and WNA has benefited our clients and our architectural practice. Thank you for your continued commitment to the strategic alliance and your exceptional, proactive approach to quality services and documents.

We are looking forward to the many years ahead as we develop and grow through the alliance with your firm.

Best regards,
